KHIN SANDAR YU

IT Cloud Operations Engineering Specialist

Bangkok, Thailand | +66 98 841 3199 | khinsandaryujob@gmail.com | linkedin.com/in/khinsandaryu393

PROFESSIONAL SUMMARY

IT Operations and Cloud Support professional with 10+ years of experience supporting enterprise IT, telecommunications applications, Linux production environments and mission-critical systems, combined with hands-on AWS cloud infrastructure experience.
Experienced in cloud and systems operations including AWS EC2, IAM, VPC, VPC Peering, Auto Scaling, Elastic Load Balancing, CloudWatch, CloudFormation and AWS CLI. Strong background in Linux and Windows administration, system health monitoring, incident troubleshooting, OS patching, maintenance, deployment validation and production support.
Experienced in L1/L2/L3 technical support, incident and service request management, root cause analysis, performance troubleshooting, log analysis, SLA management, change and release management, and operational documentation. Hands-on experience with Bash/Shell scripting, PowerShell, Python, Oracle SQL and infrastructure automation using Terraform and CloudFormation.
Experienced in supporting high-availability enterprise environments, investigating operational issues across application, infrastructure and database layers, and coordinating with technical teams, vendors and stakeholders to restore services and implement corrective actions.
AWS Certified Solutions Architect – Associate with practical AWS hands-on experience in designing and operating multi-AZ environments, networking, security controls, Auto Scaling, load balancing, monitoring and infrastructure automation.

CORE CERTIFICATIONS

AWS Certified Solutions Architect – Associate
Amazon Web Services (AWS)

ISO/IEC 27001 Information Security Associate
SkillFront

AWS Re/Start Graduate
AWS Restart Program

Project Management Professional (PMP)
Navesse Business Academy

TECHNICAL COMPETENCIES

CLOUD & INFRASTRUCTURE: AWS EC2, AWS IAM, Amazon VPC, VPC Peering, Auto Scaling, Elastic Load Balancing, Amazon RDS, Amazon S3, CloudWatch, CloudFormation, AWS CLI, AWS Private CA, Terraform

SYSTEMS ADMINISTRATION: Linux (RHEL, Ubuntu, SUSE), Windows, Bash / Shell Scripting, PowerShell, Python, OS Patching & Maintenance, Server Configuration, System Health Checks, Application Deployment, Service Availability, Performance Monitoring

NETWORKING & SECURITY: VPC Networking, VPC Peering, Security Groups, Network ACLs, Load Balancing, IAM, User / Role Access Management, Access Controls, Audit Logging, Network Troubleshooting, Least-Privilege Access

MONITORING & OPERATIONS: CloudWatch, Application Monitoring, Infrastructure Monitoring, Log Analysis, Performance Troubleshooting, Health Checks, Incident Detection, Service Availability, Operational Validation, Operational Reporting

AUTOMATION & INFRASTRUCTURE AS CODE: Terraform, AWS CloudFormation, Bash / Shell Scripting, Python, AWS CLI, Infrastructure Provisioning, Configuration Automation, Operational Task Automation, Git / GitLab

DATABASE & APPLICATION OPERATIONS: Oracle SQL, Database Investigation, Query Analysis, Application Logs, Application Troubleshooting, System Interfaces, Transaction Analysis, Production Application Support

IT SERVICE MANAGEMENT: Incident Management, Service Request Management, Problem Management, Change Management, Release Management, L1 / L2 / L3 Support, Issue Triage, Escalation, SLA / KPI Management, RCA, Preventive Actions, Operational Readiness

RESILIENCE & OPERATIONS: High Availability, Auto Scaling, Disaster Recovery Support, Backup / Restoration Validation, Deployment Validation, Post-Change Validation, Rollback Planning, Technical Documentation, SOP / Runbook Development, Vendor Coordination

PROFESSIONAL EXPERIENCE

Field Service & Operations Engineer — **D2Global IT Solutions** **2025 – Jan 2026**

- Provided technical support for enterprise IT infrastructure, systems and application environments.
- Supported AWS cloud infrastructure operations including EC2, IAM, VPC, VPC Peering, Auto Scaling and security controls.
- Configured and supported IAM users, roles and access controls in accordance with operational and security requirements.
- Supported VPC networking and VPC Peering for controlled communication between AWS environments.
- Performed system health checks, infrastructure validation and troubleshooting following configuration and infrastructure changes.
- Investigated incidents using system information, application logs, monitoring data and system diagnostics.
- Supported OS patching, maintenance, deployment and post-change validation activities following structured operational procedures.
- Supported EC2 Auto Scaling configuration and operational validation to improve application availability and resilience.
- Collaborated with technical teams and vendors to investigate infrastructure and application issues and coordinate resolution.
- Prepared technical documentation, operational procedures and support documentation for recurring operational activities.

PROFESSIONAL EXPERIENCE (CONTINUED)

Application & Delivering Senior Engineer __ MPT Telecommunications

Dec 2023 – May 2024

- Supported enterprise application operations, system integration and production support activities.
- Performed incident investigation, troubleshooting and root-cause analysis across application and database environments.
- Coordinated UAT, implementation and production deployment activities with business, technical and vendor teams.
- Supported system migration and upgrade activities with focus on service continuity and operational readiness.
- Prepared technical documentation, implementation procedures and operational handover materials.
- Supported AWS-based application environments and infrastructure operations.

Senior IT Applications & Operations— ATOM Telecommunication

Aug 2022 – Jul 2023

- Managed day-to-day IT application operations and production support for enterprise telecom systems.
- Performed incident triage, investigation, escalation and resolution in accordance with operational procedures and SLA requirements.
- Monitored application availability, system performance and infrastructure health to identify potential service-impacting issues.
- Coordinated with users, vendors and technical teams to resolve incidents and service requests.
- Supported system upgrades, implementations, maintenance and post-change validation activities.
- Prepared operational reports, incident documentation and RCA reports.
- Maintained operational procedures and contributed to continuous improvement of IT support processes.
- Managed application access and supported access-control and security requirements.
- Participated in UAT, deployment validation and operational readiness activities.
- Coordinated communication of system downtime, planned maintenance and implementation activities with relevant stakeholders.

Senior System Engineer — Whale Cloud Technologies

Mar 2022 – Aug 2022

- Configured, patched and maintained enterprise Linux production servers supporting critical business applications.
- Investigated production incidents, system bottlenecks and performance issues using Linux command-line tools, system logs and SQL queries.
- Managed application configurations and verified system interfaces across production environments.
- Supported billing, charging and mediation platforms with focus on system availability, performance and operational stability.
- Executed Bash / Shell scripts for operational automation, log parsing, data validation and routine maintenance.
- Analysed system performance and hardware utilization metrics to identify bottlenecks and implement corrective actions.
- Prepared RCA documentation, operational procedures and preventive action plans.
- Supported backup, disaster recovery and restoration validation activities.

Managed Services Systems Support Engineer__ Huawei Technologies

Mar 2014 – Mar 2022

- Provided 24/7 production support for mission-critical OSS/BSS, mediation and charging platforms.
- Performed L2/L3 incident investigation, troubleshooting, escalation and resolution under strict SLA requirements.
- Monitored system availability, application performance, logs and operational health.
- Performed Linux system administration, application troubleshooting and database investigation using Oracle SQL.
- Executed system configuration, OS patching and deployment validation through structured change-management processes.
- Prepared RCA reports, SOPs, troubleshooting guides and preventive action plans.
- Collaborated with vendor engineers and cross-functional technical teams to resolve production issues.
- Supported enterprise system upgrades and modernization activities.
- Participated in UAT, deployment and post-implementation operational readiness activities.

KEY PROJECTS & SYSTEM MIGRATIONS

Billing & Charging System Migration: Executed infrastructure and database migration activities for high-volume billing software platforms with zero unmanaged service disruption.
Enterprise System Upgrades: Coordinated software version upgrades across distributed BSS and mediation platforms for international telecommunication operators.

AWS HANDS-ON PROJECTS:
AWS Multi-AZ Application Infrastructure

- Designed and configured a multi-AZ AWS environment using Amazon VPC, public/private subnets, route tables, Internet Gateway and security controls.
- Configured VPC Peering to enable controlled communication between VPC networks.
- Implemented EC2-based application environments with Auto Scaling and Elastic Load Balancing.
- Created CloudFormation templates for repeatable AWS infrastructure deployment.
- Configured IAM roles, policies and access controls following least-privilege principles.
- Used CloudWatch for monitoring and operational validation.
- Configured HTTPS for an internal application environment using AWS Certificate Manager (ACM) and a private certificate authority.
- Performed connectivity testing, service health checks and troubleshooting using Linux tools and AWS console/CLI.

AWSOperations&SecurityLab :

- Practised EC2 provisioning, VPC networking, IAM configuration, security groups, NACLs and AWS CLI operations.
- Implemented and tested Auto Scaling behaviour and load-balancer health checks.
- Used CloudFormation to automate infrastructure provisioning and configuration.
- Performed Linux-based application deployment and troubleshooting on EC2.

EDUCATION

Bachelor of Engineering (B.E.) in Electronics and Communications
Technological University ThanLyin, Yangon, Myanmar

LANGUAGES & COMMUNITY LEADERSHIP

Languages: English (Professional Working Proficiency), Chinese (HSK II), Burmese (Native).
Volunteer Work: AWS Community Day Myanmar 2024 — Active member of AWS User Group Myanmar.
